

Figure 1 is a schematic diagram of an optical system for examining a lens. The diagram shows a light path from left to right. A light source 10 emits light through a component 11, which has a surface 11a. The light then passes through a lens 20. A vertical dashed line represents the 'POSITION FOR HOLDING A LENS FOR EXAMINATION'. A point P is marked on this line. A component 30 is positioned below the line, and a component 31 is positioned above it. The light path continues through a series of components: a rectangular block 40, a lens 60, and a rectangular block 50. The entire system is labeled with a dashed line and the number 0.
